EDUCATION AND TRAINING

Full Stack Developer
Epicode [28/03/2022 – 28/09/2022]

Address: Via dei magazzini generali, 00154 Roma (Italy)

https://epicode.com/

Field(s) of study: Information and Communication Technologies : *Software and applications development and analysis*

The Full Stack Web Development course provided by Epicode has been an intense experience for me: I used to study and practice with programming languages for 9 hours a day (Mon/Fri) for 6 months for a total of +1000 hours.
Here, with the help of teaching assistants and senior developers, I developed both strong and soft skills that led me to grow as a web developer and as a person.
Despite still continuosly studying and improving on my own even on the spare days, the course revolved around the following subjects:
- **HTML**
- **CSS**
- **Bootstrap & SAS**
- **UI / UX**
- **Javascript** (**ES6+)**
- **TypeScript**
- **Angular**
- **Java (and Spring Boot)**
- **SQL**
- **Git**

MANAGEMENT AND LEADERSHIP SKILLS

BANANO Store (e-commerce) - Founder

I started this with a friend from Zurich.

We managed to work with a manufacturer that processed our requests through specific APIs and while they dealt with production and shipping, we were in charge of the front end development and customer support.

Shipped our products from New York City to Hong Kong.

Even if short-lived, it was a really cool project and I had a great time managing it.

ORGANISATIONAL SKILLS

Community Manager for Banano.cc

Between 2019 and 2020 I helped the team of BANANO as a Community Manager.

I was in charge of the hiring process where I managed the onboarding of volunteers who were willing to help the community in any way: by managing other non-english groups of ours or by developing new apps or services.

It has been a great experience for me since I learned how to work in a multicultural and multidisciplinary team, how to deal with people and how to manage huge projects and campaigns from start to finish.

CREATIVE WORKS

NFT independent works

Between 2019 and 2020, during my spare time, I decided to do some experiments with NFTs and got myself into this space by doing some improvised works crafted using softwares like Affinity Designer, Adobe After Effects and various AI tools.

Surprisingly, I managed to sell all of my works in less than a year.

Here attached, some of the works I've done and sold to various independent collectors.

HOBBIES AND INTERESTS

Flying my drone

Sometimes I fly my drone and take photos and videos with it.

I'm also a certified EASA Drone Pilot.

Walking with my dog

I take care of my Jack Russell during the day and we often go for long walks around the city where I live.

Building with Legos

One of the toys I've grown up with. Despite not having too much space around the house, I can still find some space for the things I build with these little colorful bricks.
